

PYTHON AUTOMATION SCRIPTS NOTES

Basics of Automation Scripts with Real Life Examples

Learn Task Automation using Python

Introduction to Automation Scripts

Automation scripts wo programs hote hain jo repetitive tasks automatically perform karte hain.

Python automation ke liye bohat popular language ha.

Automation time aur effort dono save karti ha.

Developers boring manual tasks ko automate kar dete hain.

Automation scripts daily work ko fast aur easy banati hain.

Python simple syntax ki wajah se beginners ke liye best ha.

Automation IT aur business dono fields mein use hoti ha.

Scripts computer ko automatically instructions follow karwati hain.

Ye productivity ko improve karne mein help karti ha.

Automation modern technology ka important part ha.

Real Life Example: Jaise washing machine kapray automatically wash karti ha waise hi automation scripts tasks automatically karti hain.

Why Use Automation

Automation repetitive kaam ko fast banati ha.

Manual work mein mistakes ke chances zyada hote hain.

Automation accuracy ko improve karti ha.

Python scripts large amount of tasks ko easily handle kar sakti hain.

Companies automation use kar ke time save karti hain.

Developers routine tasks automate kar dete hain.

Automation productivity aur efficiency dono ko improve karti ha.

Ye human effort ko kam karti ha.

Automation modern workplaces mein bohat important ho chuki ha.

Beginners ko automation concepts samajhna zaroori ha.

Real Life Example: Alarm clock automatically waqt par jagata ha, ye bhi automation ki example ha.

File Automation

Python files ko automatically create aur manage kar sakta ha.
Automation scripts files ko rename aur move bhi kar sakti hain.
Developers backup systems banane ke liye file automation use karte hain.
Large folders ko organize karna automation se easy ho jata ha.
Python os aur shutil modules provide karta ha.
File automation office work mein bohat useful hoti ha.
Automation repetitive file tasks ko fast kar deti ha.
Beginners simple file automation projects bana sakte hain.
Ye productivity ko increase karti ha.
File automation practical programming ka important part ha.

Real Life Example: Jaise librarian books ko arrange karta ha waise hi automation files ko organize karti ha.

Web Automation

Web automation websites par automatic actions perform karti ha.
Python Selenium jaise tools provide karta ha.
Automation login aur form filling mein use hoti ha.
Developers testing aur data collection ke liye web automation use karte hain.
Web automation repetitive online tasks ko easy banati ha.
Python browsers ko control kar sakta ha.
Automation internet based work ko fast banati ha.
Beginners simple automation bots create kar sakte hain.
Web automation software testing mein bohat use hoti ha.
Ye modern development ka useful concept ha.

Real Life Example: Jaise online ticket booking automatically complete hoti ha waise hi web automation kaam karti ha.

Task Scheduling

Task scheduling ka matlab specific time par tasks run karna hota ha.
Python automation scripts ko scheduled basis par execute kar sakta ha.
Developers backups aur reports scheduling ke through automate karte hain.
Task scheduling manual work ko reduce karti ha.
Operating systems scheduling tools provide karte hain.
Automation scripts background mein automatically run hoti hain.
Scheduling business operations mein bohat useful ha.
Ye time management ko improve karti ha.
Beginners ko scheduling basics seekhna chahiye.
Automation systems mein scheduling important feature ha.

Real Life Example: Jaise school bell fixed time par bajti ha waise hi scheduled tasks specific time par run hote hain.

Benefits of Automation

Automation speed aur efficiency ko increase karti ha.
Ye repetitive tasks ko easy bana deti ha.
Companies automation se costs reduce karti hain.
Python automation beginners ke liye simple aur powerful ha.
Automation mistakes ko kam karti ha.
Developers large projects ko better manage kar sakte hain.
Automation business aur IT dono fields mein useful ha.
Ye productivity aur performance improve karti ha.
Modern technology automation ke bina incomplete ha.
Har programmer ko automation basics seekhne chahiye.

Real Life Example: Jaise ATM machine automatically cash provide karti ha waise hi automation systems kaam karte hain.
